
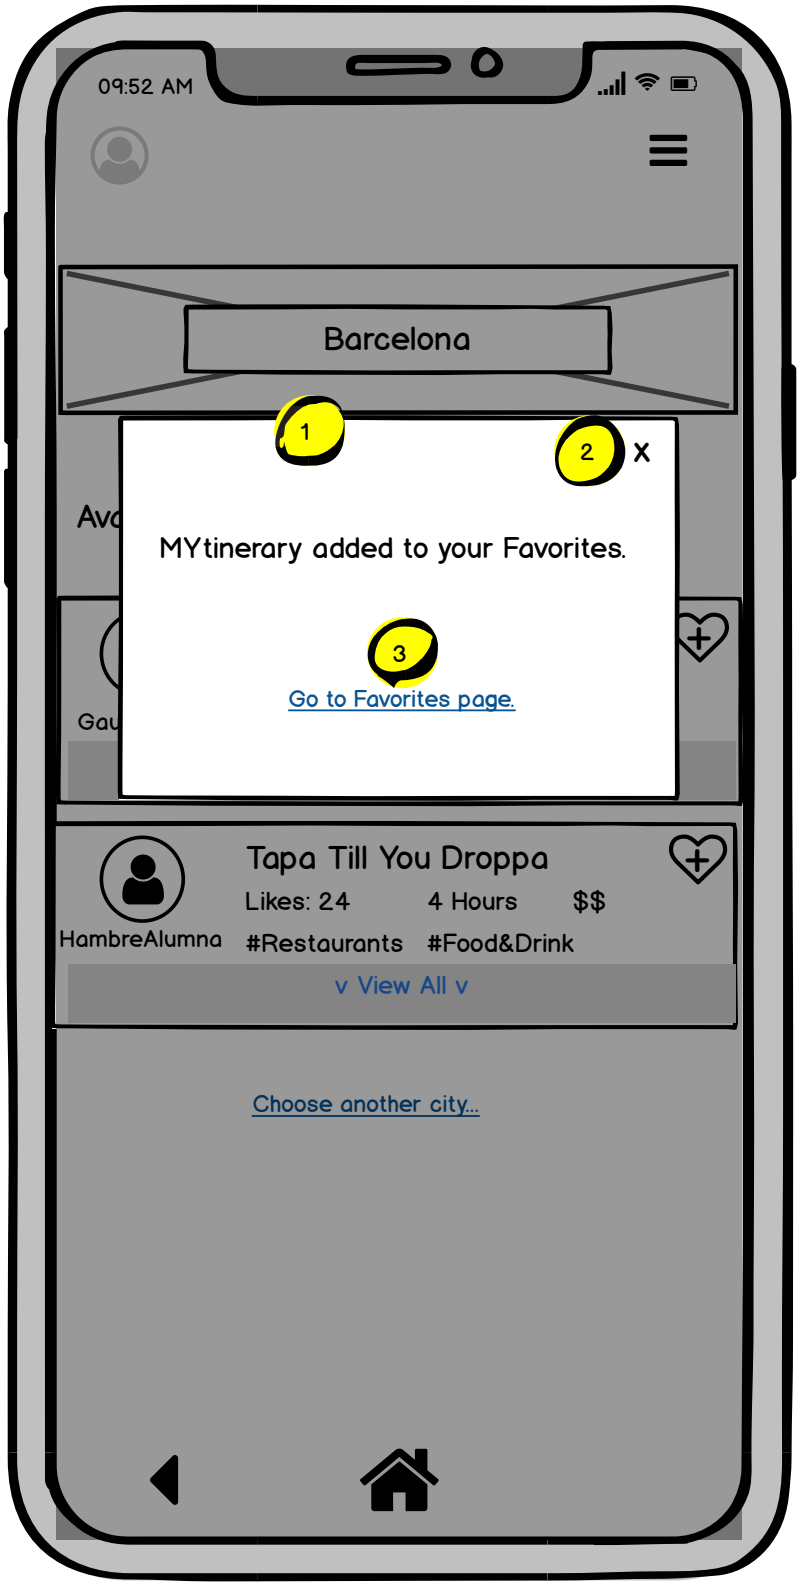
User Stories

As a user interested in a city, I would like to save different itineraries to a Favorites page.

Functional Requirements

1. Clicking on this icon saves this itinerary in a list to a new page "Favorites" associated with the user's account.



User Stories

As a user interested in an itinerary, I would like confirmation that it was saved.

As a user, I want the option to return to the list of itineraries OR to view my Favorites.

Functional Requirements

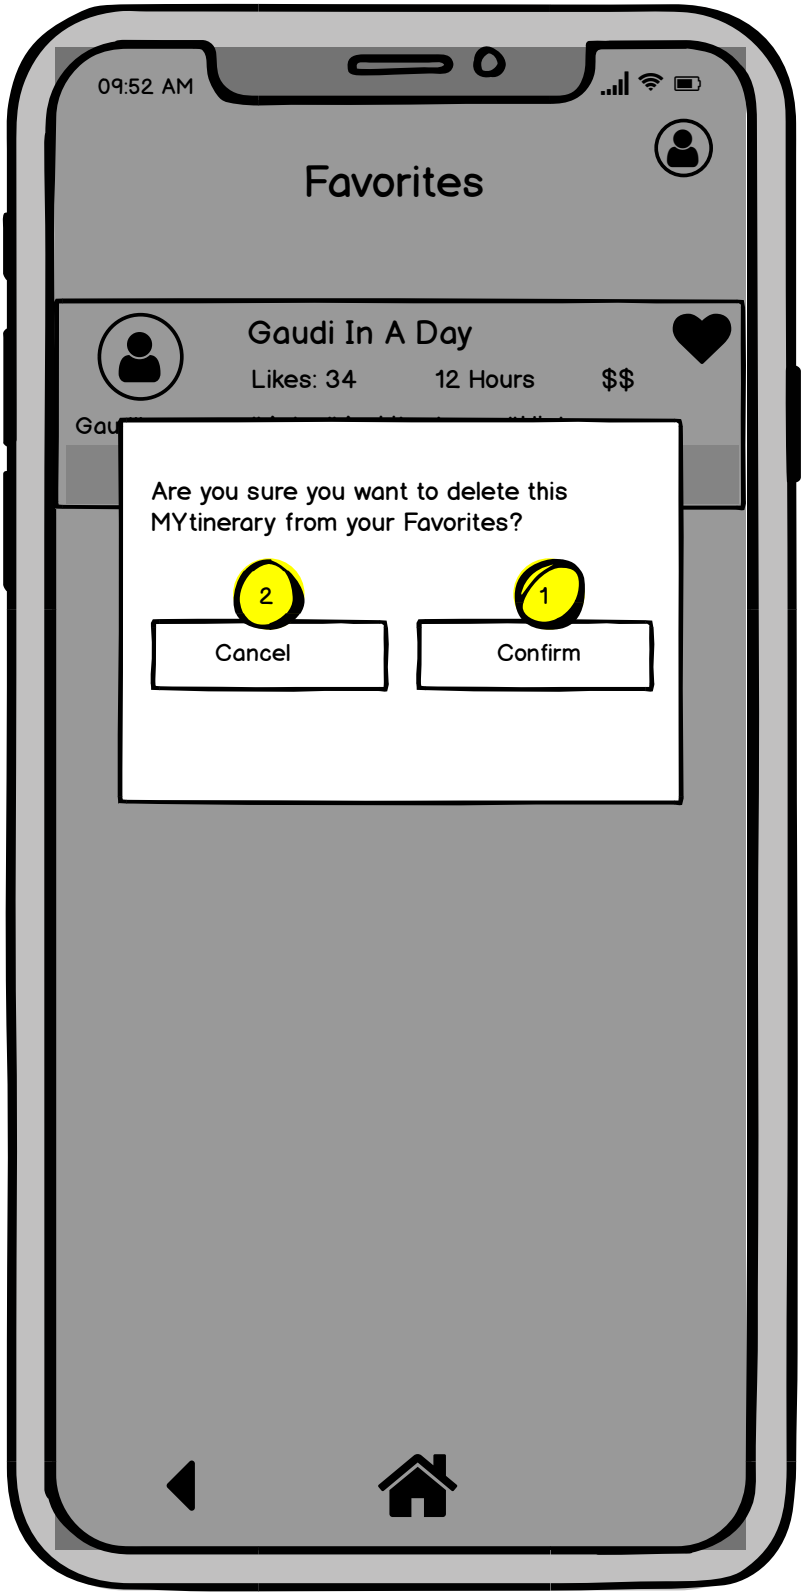
1. Modal window
2. Closes the modal window
3. Takes user to Favorites page (see next wireframe for Favorites page design requirements)

User Stories

As a user with saved Favorites, I would like the option to delete them.

Functional Requirements

1. Heart icon is clickable to remove from Favorites - clicking it prompts modal confirmation window



User Stories

As a user who sometimes clicks on things by accident, I want to confirm deletion of an itinerary from my Favorites.

Functional Requirements

1. Deletes the itinerary from Favorites list and closes the modal

2. Closes the modal without deleting the itinerary
